## Siemens Technology Provides Comfort and Convenience

Steve Berte benefits from hearing aids and accessories that work great together.

I couldn't be happier with my Siemens devices. I wear the Siemens Pure<sup>®</sup> hearing aids, along with the miniTek<sup>®</sup> remote control and automatic streamer.

I love using the miniTek as a hands-free device while driving, as well as at home or work to take calls. I also love streaming content from various entertainment devices through the miniTek when both my wife and I are listening. This allows her to keep the volume where it is comfortable for her and my miniTek and Pure hearing aids let me hear everything very clearly. Finally, I also have the ePen remote

control and that is a fantastic device. I use it when I'm not wearing the miniTek when we go to restaurants, plays, concerts, etc. It enables me to very quickly change programs and volume to fine tune my hearing for the specific location and circumstances in which I find myself.
